REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Regarding claim 29, the prior art of record fails to disclose the combination of the recited sensor containing a self-contained resonant LC circuit that varies in response to a physical property of a patient, and the recited sensor delivery catheter with inner cylindrical member. Regarding claim 55, there is no teaching in the prior art of record for modifying the recited sensor to further contain a safety wire attached to a surface of the sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Silver discloses a flexible glucose-monitoring sensor with an inductively coupled telemetry coil that may be implanted via an outer catheter and inner cylindrical member. The sensor may also contain a tether. There is no suggestion, however, to incorporate the recited resonant LC circuit that is variable in response to a physical property of the patient. The applicants give criticality to this design feature in that it allows one to manufacture a sensor that is made completely of passive components, simplifying design and allowing for miniaturization.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kennedy Schaetzle whose telephone number is 703 308-2211. The examiner can normally be reached on 9:30 -6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 703 308-0851. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
